Mr. Raymond W. Eickstedt
Epler Flight Service
Oshkosh, Wisconsin

Dear Mr. Eickstedt:

In confirmation of our telephone conversation on May 28, bolts may be used in lieu of rivets when installing the forward stabilizer attachment fitting Grumman P/N 112305 on the bulkhead P/N 107097. Enclosed is a chart Figure C-2 showing the bolts allowable and the hole size tolerances. It may be necessary to ream the existing holes to obtain these tolerances.

Very truly yours,

GRUMMAN AIRCRAFT ENGINEERING CORPORATION

Thomas D. Rae
