

# The New Century:

**T**HERE'S a new name in FBOs — *Century Aviation*. Already we're one of the best in the business with a remarkable history of serving corporate and private aircraft. We operate five stations on four islands of Hawaii, and one in Gander, Newfoundland.

Sound familiar? We're the former *Hemmeter Aviation*; a quality FBO operator since 1984.

*Century's* new owner brought us the new name (we like it!) and you'll find the same friendly people run the company. No changes there. The same experience. The same care for pilots, their passengers, their aircraft. The same courteous "Hawaiian" service.

*Century* is a company on the move. We plan to enlarge our \$2million Honolulu station. We're now offering full aircraft management to our clients. And we'll be announcing new FBO locations soon.

Those of us who fly know FBOs are not all alike. So watch the name *Century Aviation* — and remember us when you fly. Because we'll never forget you.
