The AAB website provides me with additional tools to track visitors. The following screenshots are of various pages of "Visitor Analytics" I can zoom in on each and every visitor and see each page they visit. The screen shots are as of 3/24/20.

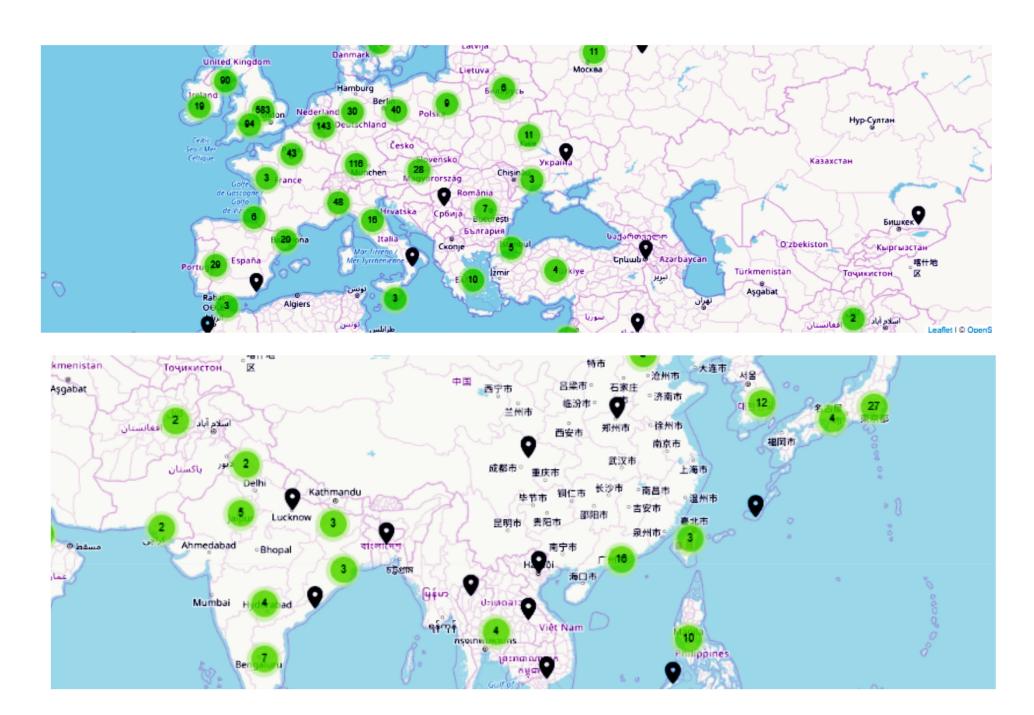

The majority of visitors use their smart phones to access the website. The information that is available to me is only to have a better understanding of visitor interest. I do not have any specific info on any visitors (contact info, etc.)

The AAB website was started three years ago and we truly have had visitors from around the world. I have reconnected with old friends and have certainly made new ones. Thank you all for your support. I will continue to work on all pages.
